

Invitation of
Ghana Nuclear Power Generation Advanced Safety Technology Science Delegates

Mr. Samuel, Chairman of the Atomic Energy Commission of the Republic of Ghana, requested training to support infrastructure development for the introduction of nuclear power generation. As part of this training, a technology science delegation was invited to Japan to learn about Japan's advanced nuclear power generation safety technology.

Details

○Term/Place: 7 days from 15th to 20th Oct, 2022

○Invited Members: 10 executive staffs from the Ghana Atomic Energy Commission (GAEC), the Nuclear Power Generation Company of Ghana (NPG), the Nuclear Power Institute (NPI) and so on who are promoting the introduction of the nuclear power generation in Ghana

○Summary

The visited sites were Kashiwazaki Nuclear Power Public Relations Center, Kashiwazaki Kariwa NPS, Tokai 2nd NPP (The Japan Atomic Power Company), Ibaraki Prefecture Nuclear Power Museum, a nuclear power manufacturer, METI and so on.

TEPCO Kashiwazaki Kariwa NPS

In the METI visit, former GAEC Chairman Benjamin, on behalf of the delegates, expressed his deep appreciation to METI for its

support of the visit. The delegation expressed their high expectations for the Japanese government to continue its cooperation in supporting the development of nuclear human resources and other infrastructure.

We consider that we were able to cooperate in supporting the development of infrastructure for the introduction of nuclear power generation in Ghana through the invitation of this delegation. We have further deepened our mutual trust with the organizations involved in the introduction of nuclear power generation in Ghana.
